* Full boxes only or remainder once full boxes are sold out.

At the end of January 2010, Crescent discontinued these products. Please use this list to help you order substitutions. The substitutions should be at the same or comparable price with the exception of the Black non Acid Free (See Note Below).

Many customers are already ordering and using these substitutions with no problems. Please continue to order the substitution numbers to insure you get the correct products.

* Brite White
 Off White

These items are all Acid Free Black and of course, cost more than the discontinued item. We are working on non-Acid Free replacements and will announce them in the future.

Any Questions?
Please call and ask for Marc LeWinter.

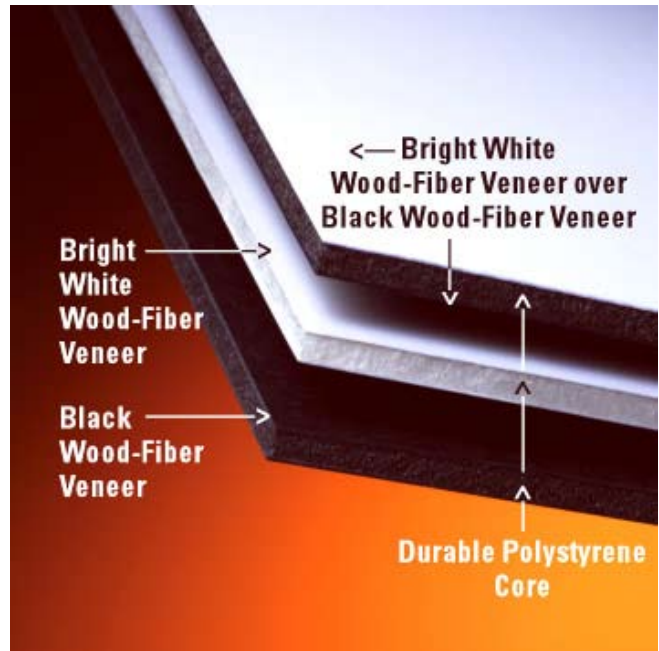

GatorFoam

Gatorfoam® Graphic Arts Board
The original heavy-duty graphic arts foam board.

Gatorfoam consists of a lightweight, durable core of extruded polystyrene foam bonded on both sides to patented Luxcell® facings. These are wood-fiber veneers impregnated with a proprietary resin for integrity, durability and moisture resistance.

Ideal for both indoor and outdoor uses (Black Gatorfoam is not recommended for exterior usage). Weatherproof and lightweight yet durable signs may be constructed from Gatorfoam.

Lightweight Gatorfoam is easy to handle during fabrication and installation. Yet it's high structural strength allows Gatorfoam to be used as a construction type material and substitute for applications in which particleboard, plywood, MDF, etc., regularly are used. Photomounters, artists, designers, sign painters, exhibit builders and engineers have counted on Gatorfoam since it was introduced to the graphic arts market in 1976. Gatorfoam's edges will not crimp, offering high-impact resistance. Gatorfoam will not warp or bow.

Gator Foam
