

Tru-View Optium™ and Optium™ Museum Acrylic

Optium Museum Acrylic - UV Optium

Optium™ Museum Acrylic with OP-3 Filtering Technology combines the display quality of Museum Glass® with the protection quality of acrylic. Uses a clear abrasion resistant acrylic substrate. Optically coats both sides of the substrate using a patented technology called Optium™ to create an anti-reflective and anti-static acrylic with superior optical qualities.

- **See price list for sizes and thicknesses**
- Filters out **98%** of harmful UV light rays
- Provides anti-static and anti-reflective properties
- Provides enhanced security
- Cuts like regular acrylic
- Cleans like Tru Vue's glass products

Optium Acrylic - Optium

Optium™ Acrylic features an anti-reflective application that provides the display quality of Museum Glass® with the light weight durability of acrylic. Patented technology creates an acrylic which is both anti-reflective and anti-static with superior optical qualities, attracting less dust and providing clearer viewing.

- **See price list for sizes and thicknesses**
- Filters out **93%** of harmful UV light rays
- Coated edge to edge on both sides
- Provides anti-static and anti-reflective properties
- Provides enhanced security
- Cuts like regular acrylic

Premium Clear™ and Optium™ Museum Acrylic

Premium Clear Acrylite - PCA

For hanging and shipping heavy, oversized art work, children's rooms, high traffic areas or anywhere extra care is required.

- **See price list for sizes and thicknesses**
- Filters out **66%** of harmful UV light rays
- Lightweight, durable acrylic
- Water white, colorless edge

Reflection Control Acrylite - RCA

Highly reflective surfaces can act like a mirror, causing glare and distracting viewers from the artwork you want to display. Reflection Control Acrylite acrylic sheet is designed to minimize reflection and show the art from almost any angle.

- **See price list for sizes and thicknesses**
- Filters out **66%** of harmful UV light rays
- Lightweight, durable acrylic
- Water white, colorless edge
- Provides glare free enjoyment without UV protection
- Etched one side

Conservation Clear Acrylite - CCA

Conservation Clear Acrylite acrylic sheet with OP-3 UV filtering technology protects works of art from the harmful effects of light. Over time, the ultraviolet rays in everyday natural and artificial light take a toll on artwork. Conservation Clear Acrylite acrylic sheet acts as a sunscreen for artwork, blocking most harmful light rays.

- **See price list for sizes and thicknesses**
- Filters out **98%** of harmful UV light rays
- Water white, colorless edge

Conservation Reflection Control Acrylite - CRCA

Conservation Reflection Control Acrylite acrylic sheet with OP-3 UV filtering technology protects artwork from the harmful effects of light and distortion of glare. Over time, the ultraviolet rays take a toll on artwork. Conservation Reflection Control Acrylite acrylic sheet acts as a sunscreen for artwork, blocking most harmful light rays.

- **See price list for sizes and thicknesses**
- Filters out **98%** of harmful UV light rays
- Water white, colorless edge
- Lightweight, durable acrylic
- Etched one side
